America stands for work. Our forefathers came to a wilderness. Trees, rocks, wild animals, heat, cold and storms faced them. Every pioneer man or woman carried a gun in one hand and an axe in the other. They knew how to use both. They cleared the forest built their homes, and laid the foundations of the America of today. They knew the value of things in terms of work. It was not who you were that counted—it was what you did.

When John Smith started Jamestown with a group of soft handed gentlemen there was trouble. These young men had never worked, nor did they know how, and they did not want to learn. But the country offered no place for idleness. There was nothing to eat unless you went after it. There was no clothing at hand to replace the fine dress, rapidly wearing out. It was a question of work or starve and John Smith set them to work. The workers won out, the drones died or went away.

From the Beginning America Said,
"Work."

Today America stretches from ocean to ocean. Great railroads span the acres between, cities tower at the mouths of harbors, factories glow day and night turning out thousands of needed articles. Our ships are in every harbor of the world. Our machines are used in every land. Our automobiles and airships cut down the distances and bring us closer to the peoples of the world.

Work, work, and more work, all done by the people of America. But the masterpieces of America are her human products, her men and her women. Her ambassadors sit in the great councils of the nations, and their words are words of wisdom.

Specialists in every line are doing wonders for the comfort of humanity. Her women keep step with the men. Her machinists, her workers, are carrying the world on their shoulders. They are America. It is not what you are that counts—it's what you do.

Yesterday America was at war. The whistle blew time! The job was done. America straightened her back, wiped her brow, and smiled,—Peace had come. Today America faces the biggest job of her history, the work of Peace. To it America! Speed up your wheels, your ships, your soul!

America's soul is her people and their purpose. Everything depends on their quality. In the Educational Department lies the foundation of America's fighting men—those who wore the uniform. Don't loaf in the park, but start the rebuilding of your mentality with them. An hour or more a day with Uncle Sam's Educators will work wonders for you and for America. All together, full steam ahead! It is not what you are that counts. Verily now, it is what you know and what you do.

All over the country in colleges, trade schools, and shops disabled men are learning to be self reliant, self supporting men. The heads of the institutions write that the men are making great progress, and that they enter into the work with a vigor and eagerness that is a cheer-o to everyone.

Whether the retrained men are telling the others, or the Board is reaching them in other ways, they are certainly getting news of their right to re-education, as four hundred and fifty a day are wanting commercial, agricultural and trades courses, and are finding their way into colleges from California to Maine.
